Inadequate first aid provision in school.	In the event of an accident, injury or emergency situation, staff, pupils and visitors may suffer as a result of inadequate first aid provision or incorrect first aid treatment.	Adequate number of first aiders, emergency first aiders, paediatric first aiders available in school. A specific risk assessment to be produced to assess the first aid provision in school. To be reviewed regularly and updated following any changes to staffing, pupil numbers etc. Specific first aid risk assessment to include consideration for additional RPE/PPE required to facilitate care. Where a need is identified these items must be available and staff informed of requirements. Training issued and refreshed continually to first aiders. First aid kits suitably stocked, located and checked routinely. Risk Definitions	
Low	Controls are adequate, no further action required, but ensure controls are monitored and any changes reassessed.
Medium	Consideration should be given as to whether the risks can be reduced using the hierarchy of control measures. Risk reduction measures should be implemented within a defined time periods. Arrangements should be made to ensure that the controls are maintained and monitored for adequacy.
High	Substantial improvements should be made to reduce the level to an acceptable level. Risk reduction measures should be implemented urgently with a defined period. Consider suspending or restricting the activity, or applying interim risks controls. Activities in this category MUST have a written method statement/safe system of work and arrangements MUST be made to ensure that the controls are maintained and monitored for adequacy.
